How do we make money?

Our App will have a download Fee, in order to get our app on track nad for manteinance Fees, its price its gonna be pretty affordable (1.99 dollars) dls and our revenue would be 1.5 dollars, to maintain our server for a year.

In order to get our app up and running we will need 100 dollars which apple require to “allow” the users to download our app from the appstore. We are also taking into account the online Server Fee from AWS, which will provide us with 50 GB of storage for 14 Dolars.

So we will only need 179 users per year to make this app posible and to get our experience Up and running.
